

13 Moon

CALENDAR

Calendar

*A mental pattern that affects our
consciousness and thus shapes our reality*

We cannot change the calendar until we change our understanding of time. To consider the new calendar, we must ask what the old one is based on. And what is a calendar anyway? And before we start talking about the calendar, we have to ask the main question:

What is Time?

According to the Law of Time, Time is not a line. Also, we need to differentiate between time and duration, because these are two different things. A clock measures duration, and duration is movement or activity within the third dimension. Time is the fourth dimension, the link between the third and fifth dimension. It is not linear, but *fractal*, *radial* and *spiral*. The Law of Time says that time is the **atmosphere of the mind** and that is the core of the 13 Moon Calendar, because by practicing it our experience of time changes, in accordance with our understanding. As our mind changes, so does our experience of time, and so do we. It is a two-way street. When we have a new understanding of time, we have a better basis to try a new calendar. The 13 Moon Calendar is a practical everyday tool that we can use to experience time as *synchronicity*.

HOW DO YOU EXPERIENCE

time?

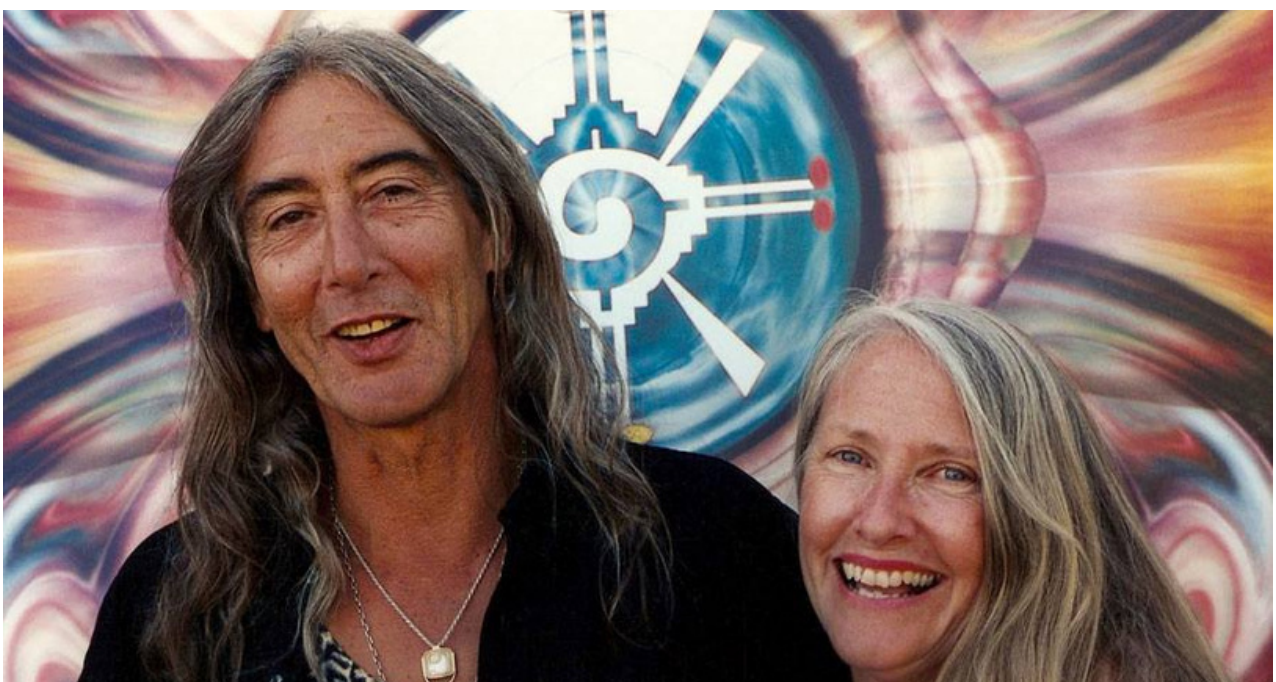

Your thoughts

It all starts with the Mind. This world is the matrix of the mind. All the thoughts, ideas, plans, and decisions on how to live our lives are in our minds. Most of these thought-forms we have now are embedded in an unconscious artificial matrix. Galactic consciousness raises our minds above our everyday earthly dramas to remember our role in the larger, cosmic Plane. The codes contained in synchronous order are frequency codes that help us rise from automatic thinking and perception. Frequency refers to the speed of vibration of consciousness. Everything vibrates, from the bed we sleep in - to the stars. When we talk about Higher Dimensions, we are talking about dimensions that vibrate faster at higher frequencies. These codes are also memory keys, but they are unlocked only if we are ready to dive deep inside. This means that we continually examine our basic belief system to determine if it supports our highest plan. Our beliefs, shaped by shared patterns of memory, create our perception of the world. The keys contained in synchronous order lead us to a new resonant field of memory. From here we can create new models of understanding and context for what is happening to us and the planet Earth. If we have a roadmap, then we have a framework that makes it easier to understand the process we are going through.

*Who owns your time owns your mind.
Change your time and you change your mind.
Change your mind and you change your world.*

dr Jose Arguelles with his wife Lloydine

The times we live in require more thinking. We are now participating in what is called the *biosphere-noosphere transition*: when life on Earth (bio-sphere) evolves into an awakened planetary mind (noo-sphere). Only by raising our minds to planetary consciousness and beyond can we accept solutions to the multiple challenges our planet faces today. With the new consciousness, we can effectively educate and mobilize humanity in creative problem solving and achieving a positive future.

Currently, humanity is living in an artificial time experience governed by an irregular 12-month Gregorian calendar and a mechanical 60-minute clock. According to this incorrect measure of TIME, life grows into devastating consequences for SPACE: our physical world. The deep fallacy that arises from this distorted linear view of time is the belief that the third dimension is the only dimension. This perception leads people to think that physical reality is the only reality. By changing our attitude towards time, we change the perception of ourselves and the world. A correct understanding of natural time opens us to a vast realm of synchronicity and synchronic order. Here we will find new solutions to the challenges we face, both individually and collectively.

As inhabitants of the Earth, we are responsible
to help in this planetary transition
by consciously raising our own frequency
into new vibrations and new times.

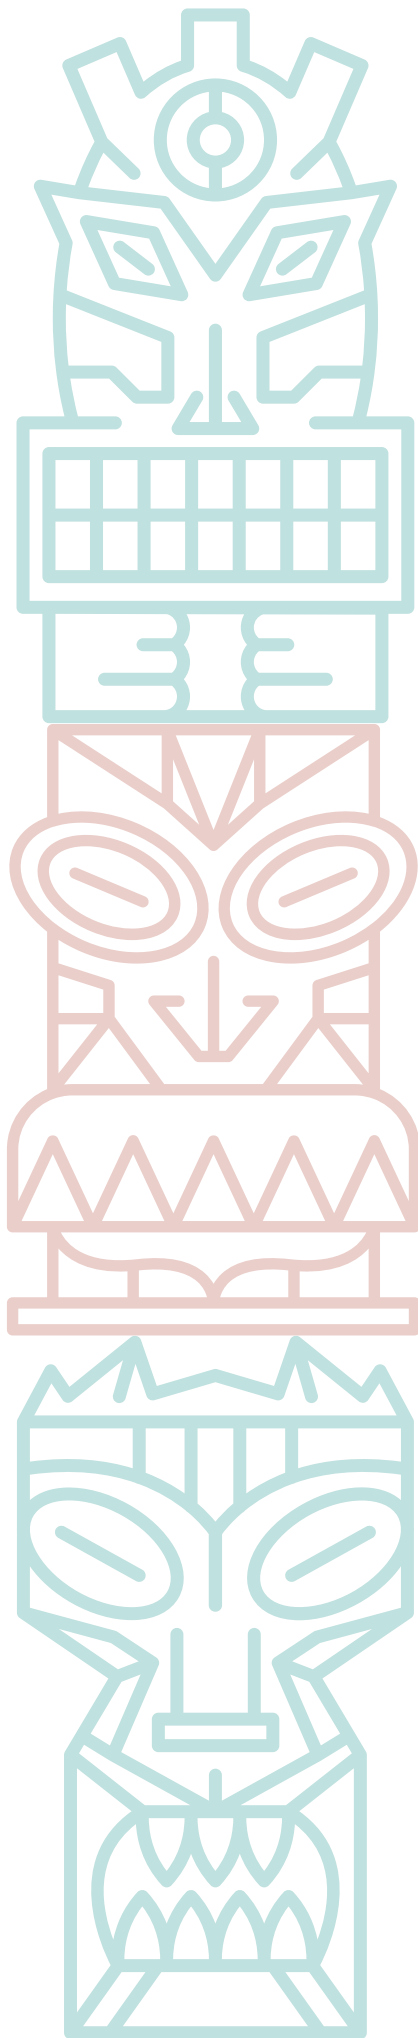

This in turn helps
raising the frequency of the entire planet.

The Law of Time is a complex new system of thought and perception that unites science, spirituality, and art. The first step is to change your attitude towards time. The 13 Months / 28 Days Calendar is the simplest and most direct way to experience the NEW NOW. In addition, knowledge of the Law of Time expands as much as you are inspired to go. Remember that we manage energy, not time, that is, we manage energy within time.

Since its founding in 2000, the Law of Time Foundation has been promoting the 13 months / 28 days calendar as a new time standard for all people who truly want a new world. The knowledge I share with you is based on the books of Jose Arguelles, the founder of the Foundation for the Law of Time. Arguelles is the initiator of the world-famous global peace meditation Harmonic Convergence, which took place on 16 and 17 August 1987. Also, Arguelles awakened mass awareness of the importance of 2012 and drew the world's attention to the Mayas and their calendar system. His book *The Maya Factor* gives credibility to Mayan calendar cycles in natural time and reveals a historically unprecedented galactic shift in time that came in 2012 and the entry into a new galactic beam that began July 26, 2013.

Growing from the life research of Jose Arguelles on mathematical, prophetic and philosophical principles, emphasized by the system of the Mayan calendar of Central America, the Law of Time, formulated as $T(E) = Art$, represents energy separated by time equal to art. This pattern demonstrates that time is a universal factor of synchronization, counting both - the elegance of the natural order and the survival of the universal field of telepathy. That is why the Law of Time radically changes our notion of time, based on the measurement of space, awakening a completely new vision of a changed world - a world where time is no longer money but art!

According to the Law of Time, modern humanity is in crisis because it is immersed in a wrong and artificial perception of time, due to which civilization is rapidly deviating from the natural order of the universe. In order to improve this self-destructive situation, collective unification is needed. For this reason, Jose Arguelles promoted a return to the natural time cycle through regular 13-month / 28-day calendar measurements. Knowing that the Maya experimented with 17 calendars at the same time, living multiple cycles at once, Arguelles discovered that a 28-day cycle of 13 months is more than a calendar. It is the main synchronization matrix by which all other systems and calculations can be synchronized. For that reason, he called it Synchrometer - a tool for measuring synchronicity. To prepare us for the transition from linear to galactic time, he created a number of navigation tools.

The 13-moon calendar is the only calendar that takes into account the unity of planetary and galactic time. The 13-moon calendar is actually the fourth dimension of the harmonic function of galactic time. It is synchronized with the 260-day galactic spin (Tzolkin), the galactic synchronization standard, otherwise known as the 13:20 frequency. The 13 moon calendar also carries the frequency 13:28 (13 months: 28 days).

The key components of the synchronic order are 20 solar seals and 13 galactic tones. They serve as (destiny) guides and markers that monitor and ultimately reinforce the synchronicities in our lives. When we recognize the flow of synchronicity, then we can begin to see how the divine pattern appears. The connections between synchronicities are becoming more obvious, and the signs are more intense. Nature takes on a new color when we begin to perceive mathematics and sacred geometry behind every leaf and flower. Life takes on a new meaning. Nothing is everyday. Everything is ordinary. Everything is elegant. Everything is coded and is part of a larger cosmic plan.

TIME IS THE ATMOSPHERE OF THE MIND

TIME IS NOT QUANTITY, BUT QUALITY

**TIME IS THE UNIVERSAL
FACTOR OF SYNCHRONIZATION.**

**VREME JE SPONA IZMEĐU
TREĆE I PETE DIMENZIJE.**

TIME IS AN INVISIBLE PRINCIPLE

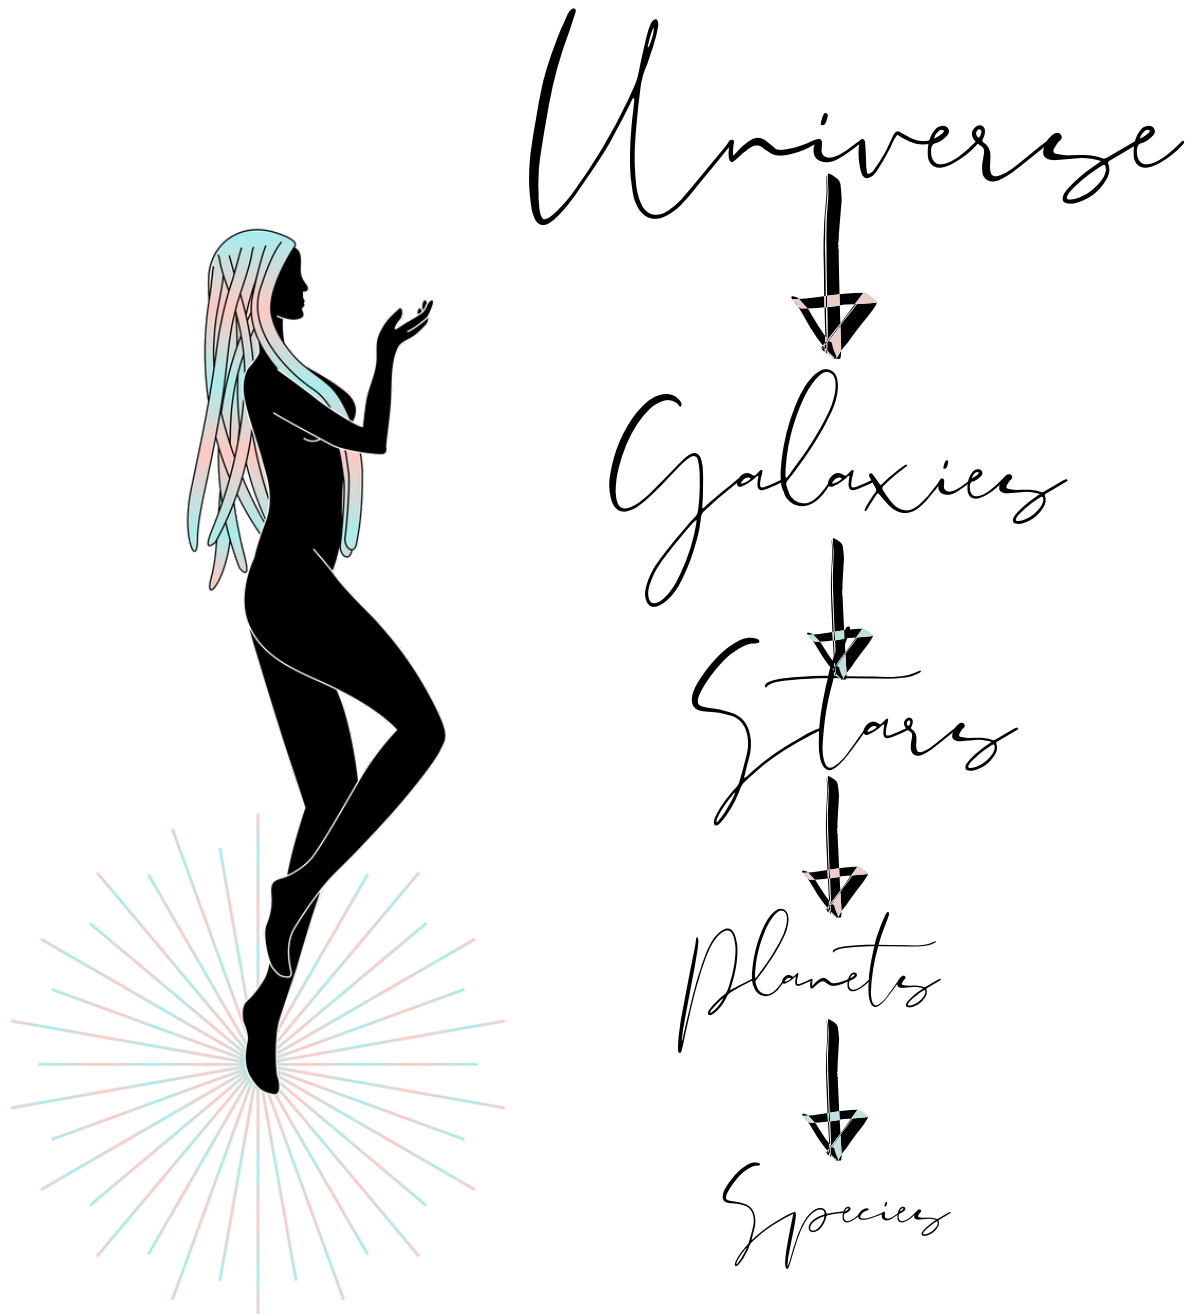

WHICH AFFECTS THE SPACE

TIME IS NOT LINEAR, BUT

RACTAL, RADIAL AND SPIRAL

TIME IS NOT MONEY

Time is Art!

We are an **energy** built by the Universal Order that takes place in **cycles**.

The universe encompasses galactic cycles.

The universe has millions of galaxies.

Our solar system is in one of them.

Our galaxy is the Milky Way, and its heart is **Hunab Ku**.

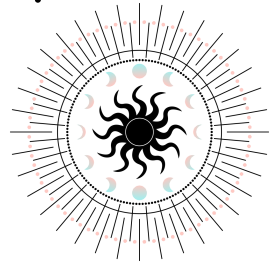

Galaxies encompass stars cycles.

Stars encompass planetary cycles.

Planets encompass cycles of each species.

The Earth revolves around the Sun.

The Earth revolves around the Sun in a year.

The Earth rotates on its axis.

Earth rotates on its axis in 24 hours - rotation (day/night)

The Earth and the Sun revolve around Alcyone,
of the central sun of the Pleiades.

A precession cycle that lasts approximately **26,000 years**

The Moon is our natural satellite.

The Moon revolves around the Earth.

The Moon rotates on its axis.

In both cases, it needs **28 days**.

The Earth goes around the Sun once in a year.

The Moon goes around the Earth 13 times in a year.

Creation of the Moon around the Earth - **DNA spiral**

**When people became aware of natural cycles,
they realized that there was an ORDER.**

**CALCULATING TIME THROUGH
PLANETARY, LUNAR, SOLAR AND GALACTIC MOTION**

Solstice

when the Earth is farthest from the Sun (longest or shortest day of the year)

The solstice is an astronomical event that occurs twice a year. On that day, the Sun reaches its highest or lowest point in the sky above the horizon. The word solstice is derived from Lat. sol (Sun) and sistere (to stand), because the Sun, viewed from Earth, seems to stop - to change the direction of movement. Solstice is the longest day of the year (summer - June 21) or the shortest day of the year (winter - December 21).

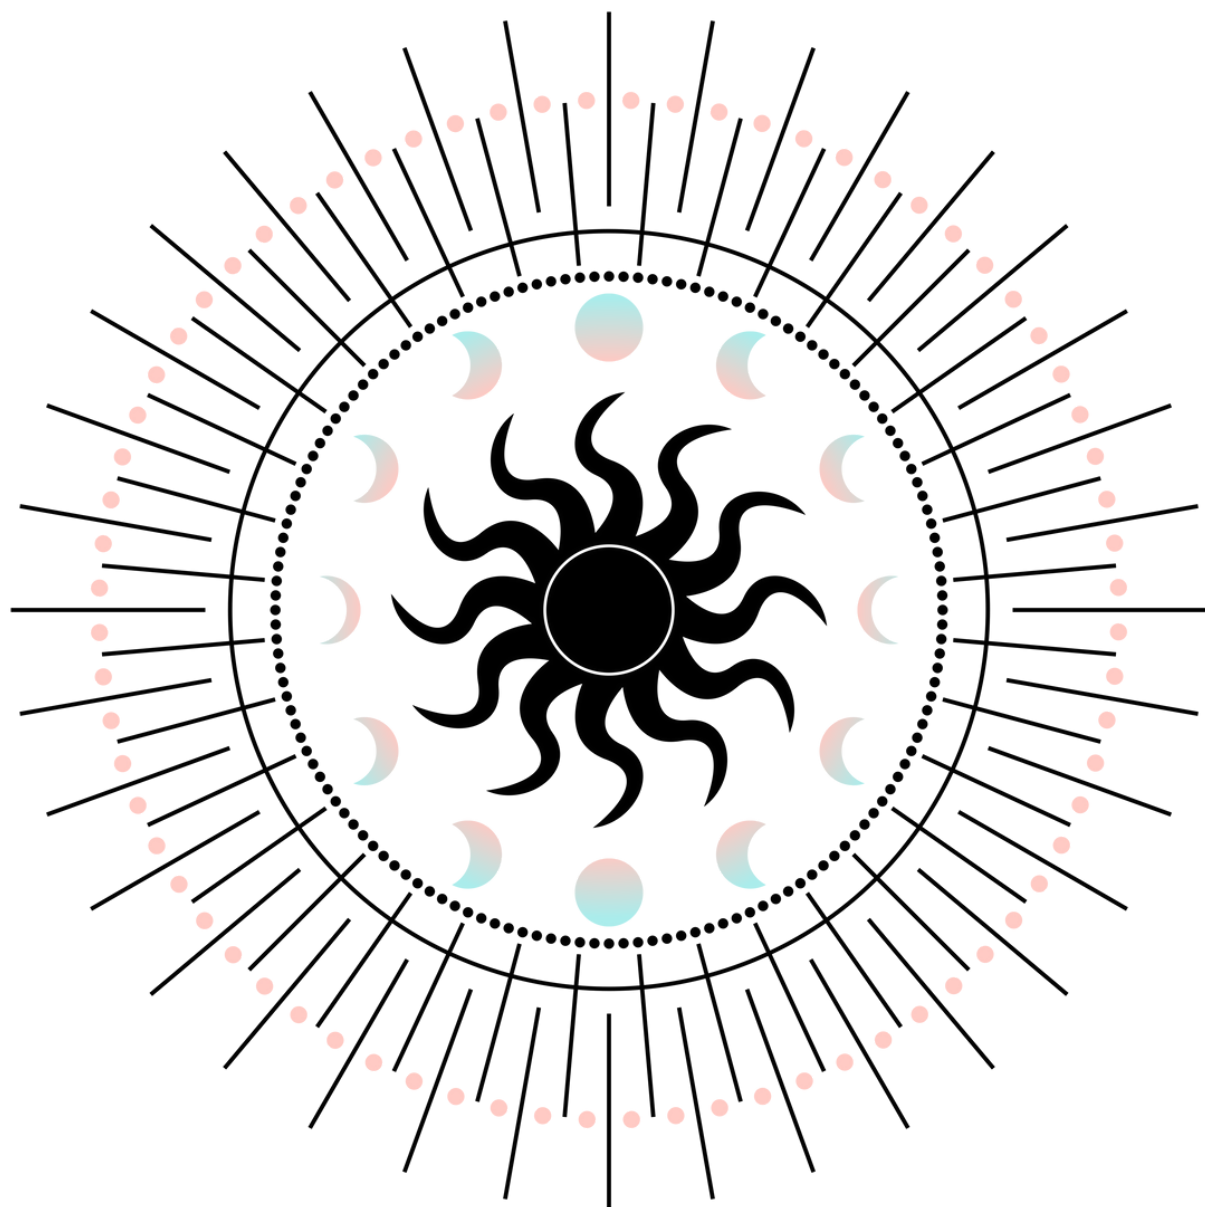

Equinox

when the earth is closest to the sun (Vernal & Autumnal)

The equinox is the day when night and day are of equal duration. There are two equinoxes: in spring and in autumn. The vernal equinox is generally on March 20 and marks the beginning of spring in the northern hemisphere and autumn in the southern. The autumnal equinox is usually on September 23 and marks the beginning of autumn in the northern hemisphere and spring in the southern hemisphere. The exact date of the equinox is the day when the Sun is in gamma (spring equinox) or omega point (autumn equinox), that is, when it crosses the celestial equator during its movement along the ecliptic.

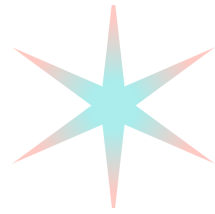

13:20 NATURAL CYCLES

12:60 ARTIFICIAL CYCLES

USE OF THE

Calendar

A calendar is a program that contains the beliefs, thoughts and ideas of a civilization and thus shapes the collective consciousness. Time is the factor of universal synchronization, and the calendar is the matrix of Time. The purpose of the calendar is to align with Time. Our experience of time has an extraordinary influence on our life.

Practicing the 13 months / 28 day Calendar is a reformulation of the human mind. Only by reformulating the human mind will the next evolutionary step take place. Many times when new information comes to us that we don't understand, we stop paying attention to it because we focus on what we didn't understand. Our life and world look like this today because we have concentrated on certain forms. The fact is that the Gregorian calendar and the mechanical clock are the fundamental forms on which we as a human species have concentrated. The Gregorian calendar currently used around the world has units of measurement that do not correspond to natural cycles.

In the natural frequency 13:20 time is art.

The law of time confirms that all the planetary upheavals and social chaos we experience today are directly related to the preference for human laws and machine technology over divine order and natural law. This is due to a collective misperception of time known as the 12:60 frequency. It refers to the twelve-month cycle of the irregular Gregorian calendar based on the 60-minute clock. Living in an artificial time separates us from our true nature, both individually and collectively. We always feel like we don't have "enough time." In the 12:60 frequency, time is money. In the natural frequency 13:20 time is art.

What the calendar does to our mind is so profound that to fully reconcile with it would mean not questioning the foundations of human life and thought. When we lead our life according to the Gregorian calendar and the mechanical clock, without questioning where it comes from and why we use it, then we live according to an "unconscious program". Let's keep in mind that the calendar is a programming device, one of the lasting signs of human culture. As a programming device, the calendar is the main instrument that gives the overall look and feel to the society that uses it. The fact is that almost the entire planet works on an unconscious program!

As the most practical application of the Law of Time, the 13 Moon Calendar is an eternal and perfect harmonic standard intended to replace the irregular measurement of the current world standard – the Gregorian calendar. The 13-moon calendar contains a 365-day year combined with a 260-day calendar. This is NOT the Mayan calendar, but is based on it. They called the annual calendar Haab, and the cycle of 260 days Tzolkin (Colkin). The ancient Yucatan Maya culture was very advanced in its knowledge of the cycle of time. They knew things that we have only recently discovered thanks to modern technology. The calendar they designed is the most accurate calendar in the world and can be easily synchronized with all other calendars that follow natural cycles.

The 12-month Gregorian calendar is not only inaccurate, it is also arbitrary and irregular, lacking any connection to valid natural cycles. Some months have 31 days, some 30, even February has 28 days with the exception of one extra day every fourth year (but not for centuries except when divisible by 4). Names of the months too. For example, October is the tenth month even though it means the number 8, December is the number 10, and the month is the twelfth. The 12-month calendar hides the thirteenth month. The number 13 is now surrounded by superstitions and taboos that are taken into account; unhappy and/or evil. This fear is reinforced by cultural antiquities such as "Friday the 13th". Buildings often do not have a 13th floor or the constructor avoids the number 13. Why?

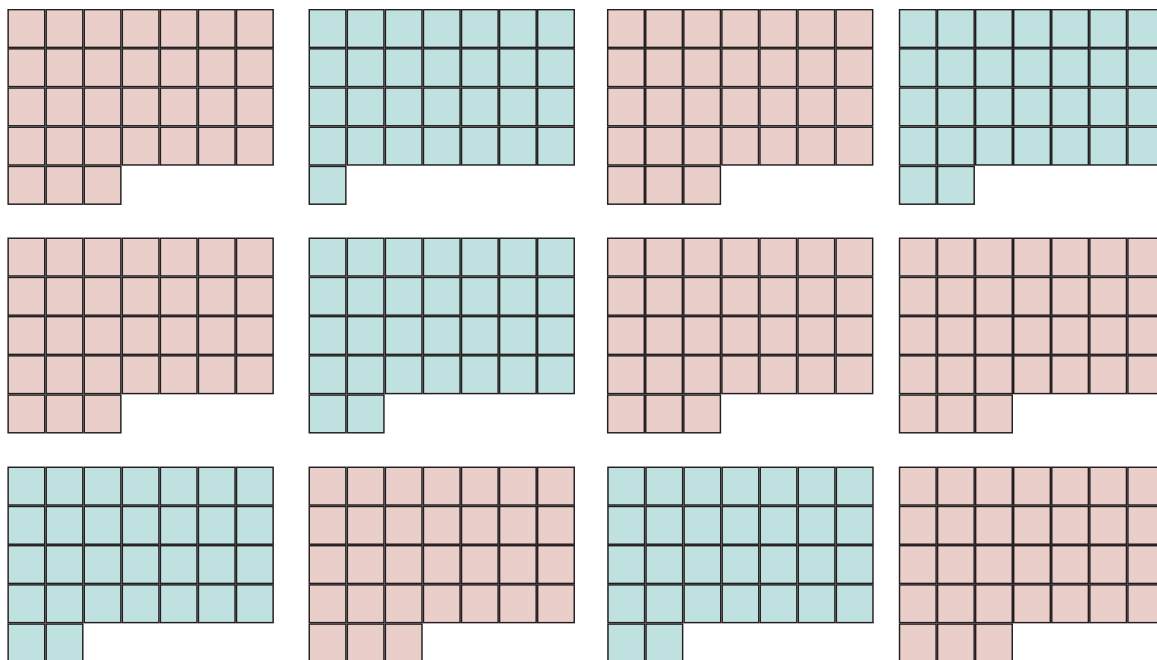

The ancient Mayans had a completely different relationship to the number 13, actually treating it as the Key of Time itself. The number 13 is a Mayan primary galactic number; the power of universal movement and creation. Together with the number 20, it is the basis for the Tzolkin calendar. It is difficult to fully grasp the meaning of all the information at once. However, it is important to see that there is another calendar that gives everyone the opportunity to re-synchronize with natural time, and remember the "cycle of 260". Don't try to understand everything all at once. As soon as you find out, apply it immediately.

All you need to do is to remember...

Gregorian

KEEPERS OF THE YEAR

26.07. – 24.07.

25.07. DAY OUT OF TIME

MAGNETIC MOON OF THE BAT

What is the purpose?

26.07. - 22.08.

LUNAR MOON OF THE SCORPIO

What are the obstacles?

23.08. - 19.09.

ELECTRIC MOON OF THE DEER

How can I be of service?

20.09. - 17.10.

SELF-EXISTING MOON OF THE OWL

What is the form of action?

18.10. - 14.11.

OVERTONE MOON OF THE PEACOCK

How do I get empowered?

15.11. - 12.12.

RHYTHMIC MOON OF THE LIZARD

How do I organise myself to overcome obstacles & achieve balance?

13.12. - 09.01.

RESONANT MOON OF THE MONKEY

How do I get centered?

10.01. - 06.02.

GALACTIC MOON OF THE HAWK

Do I live what I believe in?

07.02. - 06.03.

SOLAR MOON OF THE JAGUAR

How do I make it happen?

07.03. - 03.04.

PLANETARY MOON OF THE DOG

How can I make it better?

04.04. - 01.05.

SPECTRAL MOON OF THE SNAKE

What do I need to release in order to move forward?

02.05. - 29.05.

CRYSTAL MOON OF THE RABBIT

How can I dedicate to all that lives?

30.05. - 26.06.

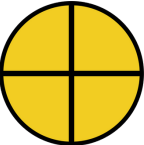

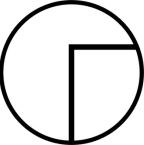

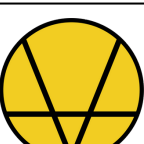

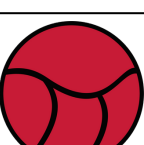

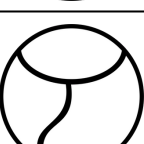

COSMIC MOON OF THE TURTLE

How can I spread my love & joy?

27.06. - 24.07.

7 radial plasmas
7 cosmic electricities
7 chakras

7 days of the week

The law of time sheds light on these matters and offers a solution. The 13 Moon Calendar is a practical application of the Law of Time. Changing the calendar will make everyone aware of the time. Rooted in the time knowledge of the ancient Mayans, The Law of Time is a discovery that aims to bring to consciousness knowledge that until this point has been intuitive and largely dormant. The calendar of 13 months / 28 days is the salvation of the planet Earth because it is a cosmic mechanism that creates a frequency that corresponds to the solar frequency. Attuning to this solar frequency will result in heightened consciousness - this is an evolutionary switch for travel. The 13 Moon Calendar was developed to allow us all to live in sync with one calendar. As the perfect measure of cosmic time, this calendar is actually a *synchronometer*, an instrument for measuring synchronicity. If we follow it daily, it gives us a new perspective in which to look at events. In the New Age, synchronicity is the norm.

Almost everywhere in the world, people celebrate the New Year on January 1st: a new beginning with new chances and new resolutions. However, that magical date is based on an agreement that was once made. In other words, the year could very easily start on another day. It all depends on the date we agree on... (Explore how the calendar has changed throughout history for a deeper understanding). The ancient Maya and the Egyptians agreed on a different date: their year began on July 26. They were aware of the fact that on July 26, the Sun and Sirius appear together on our horizon at the exact same moment and in the exact same place. With a minor difference of 3 minutes, the Earth, Sun and Sirius are aligned at that moment. No other synchronicity between these 3 celestial bodies occurs during the year. That's why the 13 Moon Calendar starts on July 26.

Using the 13 Moon Calendar will not only adapt us to nature, but will also help us see all aspects of our life through a different prism. Follow the 13 Moon Calendar every day for 28 days and note what internal changes occur and what emerges from new perceptions of reality. You will become increasingly aware of the patterns in your life. Like anything in life, the more energy you put in, the more you'll reap the benefits, in this case, galactic vision. Galactic, because time is not a local thing. It is the universal medium of synchronization. By living in synchronic order you can begin to piece together the larger parts of your life. By becoming aware of the patterns in your life you can see how the calendar affects your mind.

Where does the Gregorian calendar come from?

Is it the best choice of calendar
for our world?

What historical program
can be written in it?

Isn't it time to banish the fear and allow ourselves to blend into the pattern
that connects us directly to our galactic being?
